

I spent over \$2,000 on an HDTV last year and do not want you to do anything to compromise my ability to receive HDTV service on this TV from my local cable provider TimeWarner Houston. I intend to use this set for many years and did not expect when I purchased it that regulations would be enacted to prevent its use.

Also, while copyrights are important and must be honored, so to must the fair use of purchased copywrited material. No regulations should be promulgated that would abrogate that right.
